A PROFESSIONAL CNC MACHINES MANUFACTURER

THE MOST EFFICIENT & INTELLIGENT MACH PERFORMANCE MACHINING, INCREASE PRO

• UMC-1600 5 AXES SIMULTANEOUS MILLING CENTER:

- Latest innovation of combination of both bridge type machine and traveling column type machine design advantage
- large 1620mm x 1260mm x 1050mm three linear axis travel
- ϕ 1320mm CNC continuous torque rotary table with 4000kg load
- 0.001° swivel milling head with torque motor driven
- Standard 3 axis linear scales & 2 axis absolute rotary encoder
- Powerful motor spindle HSK-A100 / 29.6KW&54.2KW / 128Nm&320Nm / 8000RPM with ϕ 100mm ceramic bearings
- Patented X axis 4 slide ways design (M417981) with maximum rigidity to ensure heavy cutting

INING CONCEPT FOR MULTI-SIDED HIGH DUCTIVITY, FLEXIBILITY AND REPEATABILITY

Sliding front & side doors with a super wide top opening, this make very easily for straight forward loading awkward shaped workpiece.

NEXT GENERATION

● BALL SCREWS

- ▶ The high precise & rigid $\Phi 55/55/63$ mm diameter ballscrews on 3 axes, driven by powerful AC servo motors, directly coupled by couplings provides the utmost results in high speed cutting for the very fine accuracy and finishing.

● ROLLER GUIDEWAYS

- ▶ The high rigid & heavy duty 55mm roller type linear motion guideways on 3 axes to provide low starting inertia, low friction and high acceleration, rates optimizing servo drive and ensure machine response immediately & precisely for high speed cutting requirements, especially in rapid positioning and contouring cutting.

TECHNOLOGY DESIGN

● RIGID CASTING FRAME

- ▶ Using the most advanced Computer Aided Design and Finite Element Method analysis programs, an extremely rigid casting frame is being created.

Swiss Schneegerber made 55mm width roller guideways :

- Z axis - 2 guideways with 6 runner blocks

- X axis - 4 guideways with 8 runner blocks

- Y axis - 2 guideways with 4 runner blocks

B AXIS INNOVATIVE SWIVEL MILLING HEAD

- ▶ The latest technology torque motor manages the B axis continuous swivel milling head , it guarantees maximum movement dynamic and linearity and thanks to the absence of those traditional mechanical kinematics parts, it results a much higher performance on finishing surface. The direct reading system by a high precision angular encoder is being integrated for maximum precision.

- ▶ Offers an extra flexibility; the fully automatic 0.001° indexing from vertical to horizontal positions by means of torque motor, this gives operator an extra flexibility: multi-sided machining without re-setting the workpiece; manufacture of complex components with a single set-up; 5 sided machining without additional fixture.

C AXIS DURABLE CNC TORQUE TABLE

- ▶ The latest technology torque motor drive rotary table manages the C axis continuously, it provides the maximum dynamics and extremely short time & highest accuracy for table positioning (+-5" absolute encoder included as standard), zero backlash and high performance due to no gearing, also very high and very low uniform rotational speeds (30 RPM for milling and 300RPM for mill-turn).
